

ATISlinear

Pneumatic manipulator running on rails characterized for a vertical movement on a linear guide. Ideal to handle products on their vertical axis in reduced working spaces.

OPTIONAL ROTATING FLANGE

Allows a continuous 360° rotation manual or motorized

BALANCING CYLINDERS

Low friction cylinders developed with ATIS technology obtained by the application of special technical features

TRAVELLING GUIDE

Low resistance linear motion system

ATISlinear

ATISlinear CONFIGURATION

- column mounted fixed to the floor
- column mounted on self standing base
- overhead
- overhead on rails

MAXIMUM
CAPACITY

450 kg

VERTICAL
STROKE

1,2 m

OFFSET
LOADS
