

## Rigid Arm Pneumatic Manipulator with Flange

**ATIS**  
MANIPOLATORI PNEUMATICI

The ATISferax manipulator is designed to meet specific handling needs, offering a stable, precise and safe system. In its flanged tool version, it can be easily integrated with gripping devices already supplied by the customer, adapting perfectly to the existing production context.

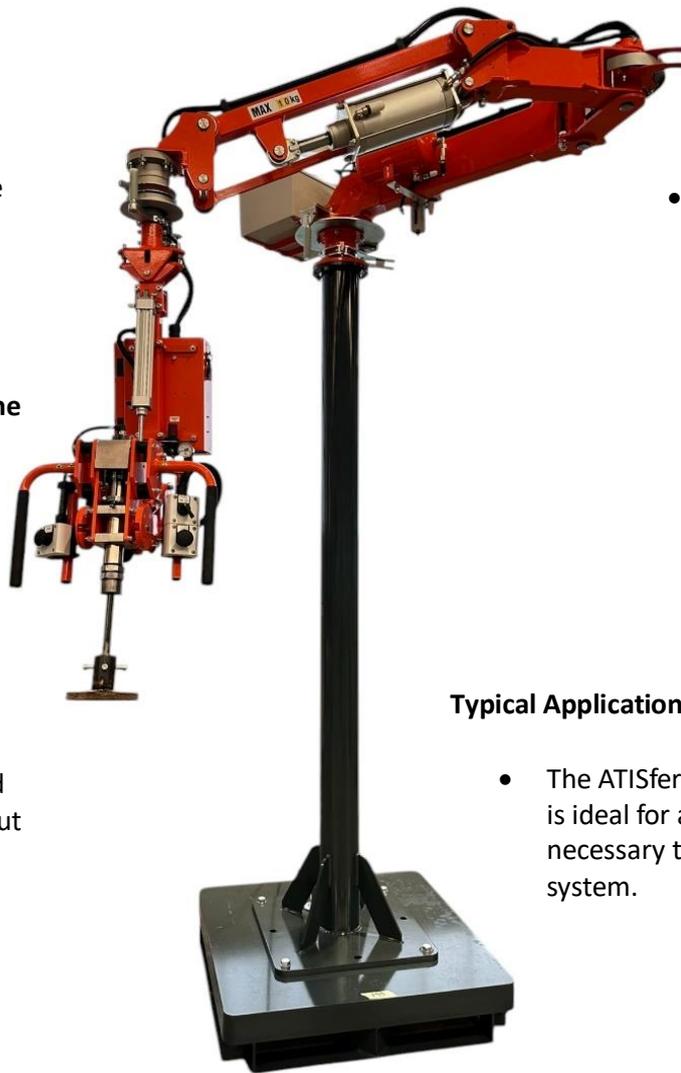

- **Movement:** fluid and controlled
- **Connection via flange** to integrate the customer's gripping tool
- **Structure:** Rigid arm made of high-strength steel to ensure stability.

### Advantages:

- **Movements:** The rigid arm structure of the ATISferax manipulator guarantees a wide freedom of movement within the production area. The vertical excursion allows a fluid and controlled movement on different working levels.
- **Integration and stability:** The manipulator is equipped with a tool brake and a joint with a stop, which ensure maximum stability during all operating phases. The flange connection allows the use of gripping tools already supplied to the customer, ensuring rapid integration without structural modifications.

### Frequently Asked Questions:

- **Is it possible to use an existing gripping tool?**  
Yes, thanks to the interface flange, our manipulators can be easily connected to a tool supplied by the customer, ensuring compatibility and cost savings.
- **Can the manipulator be used with tools already present in the company?**  
Yes, thanks to the flange connection, ATISferax can be easily interfaced with existing gripping tools.
- **Is any system modification required to install ATISferax?**  
No, the rigid arm structure and the modularity of the manipulator allow for quick and non-invasive installation, without interventions structural on the system.

### Typical Applications:

- The ATISferax manipulator with flange tool is ideal for all applications where it is necessary to integrate an existing gripping system.

The ATISferax manipulator configuration with flange attachment has been designed to easily integrate with the gripping tool already in use by the customer. The stability of the structure and the capacity of the manipulator allow to manage the handling in a safe, efficient way and perfectly adapted to the existing production process.

**Invest in the safety and efficiency of your operators. Our manipulator is the ideal solution for moving safely and precisely. Contact us to find out how to customize it to your specific needs.**
