

ENVIRONMENTAL POLICY

ATIS SRL CONSIDERS THAT THE PROTECTION OF THE ENVIRONMENT AND THE PROTECTION OF THE CLIMATE, AS WELL AS THE RESPONSIBLE USE OF ENERGY AND RESOURCES, ARE IMPORTANT AZINEDAL OBJECTIVES.

ENVIRONMENTAL AND ENERGY MANAGEMENT ARE FOCAL POINTS. FOR THIS ATIS HAS RECENTLY CHOSEN TO BUILD A PRODUCTION SITE WITH VERY HIGH ENERGY STANDARDS AND WITH EXTREME ATTENTION TO ENVIRONMENTAL INTEGRATION, WHERE THE EXPLOITATION OF RENEWABLE ENERGIES IS MAXIMUM AND THE ATTENTION TO ENERGY SAVING AND THE MANAGEMENT OF SOURCES THE MOST MODERN AND ADVANCED SYSTEMS ARE INTEGRATED WITH THE OBTAINMENT OF **NEARLY ZERO IMPACT BUILDING CERTIFICATION**.

RESPECT FOR THE ENVIRONMENT AT 360 °

Both for the development of new products and services, and also during our operational processes, we are careful that the impact on the environment is minimized and the use of energy and natural resources are enhanced within our factory. . This is achieved by implementing the objectives defined in our environmental and climate protection programs and through close collaboration with our suppliers and customers, as well as with public and private institutions.

COMPLIANCE WITH REGULATORY OBLIGATIONS

At regular intervals, our company systematically determines the relevant environmental and energy aspects of its activities, products and services. This includes in particular the sectors of waste and its recycling, air, noise, energy and climate, as well as water and nature protection. Measures are taken to avoid problems during the work phases and processes with a negative impact on our environmental and energy performance. Thanks to periodic checks, we guarantee compliance with applicable regulations and other requirements

ATIS is committed to the responsible management of environmental impacts and considers it a strategic corporate objective to aim at the continuous improvement of energy efficiency, with the clear intention of reducing the costs associated with the use of energy to meet its own needs. In order to ensure the continuous improvement of its environmental and energy performance and its management system, ATIS undertakes to ensure the availability of information and resources, is ready to ensure compliance with all applicable laws and other requirements in force, to implement the provisions and any suggestions reported by the Responsible Bodies.

Our commitment is aimed in particular at

- Use of energy from renewable sources, the energy not self-produced with our photovoltaic system is purchased from a supplier who guarantees the origin of hydroelectric plants in the area. Therefore all the energy used by ATIS comes exclusively from renewable sources
- Use of low energy consumption systems and construction of a CLASS A building and analysis of the acoustic impact on the surrounding environment
- Use of geothermal energy with authorized access to the underground water table with re-entry of the water used for cooling / heating without chemical modification of the water withdrawn
- Atmospheric emissions controlled and authorized as per current regulations
- Integration of the building into the landscape with the creation of green areas higher in size than the current legislation.
- Improvement of separate waste collection in all areas, both offices and production, as required by the local regulations (Trentino Alto Adige 73.08% separate waste collection at the highest national levels)
- Careful management of special waste with transfer to specialized companies of ferrous residues, wood, aluminum, sand and relative management of analyzes and correct division into CER
