

ATIS MIRUS 80

Pneumatic manipulator with rigid articulated arms, the smallest in its category. Designed for handling light products with unusual shapes, ideal for sustained working cycles. Lightness, precision and speed are the main features of this manipulator, which can be integrated with customized gripping equipment, designed and structured according to the specific needs of the customer.

PRESSURE REGULATOR

It allows the power supply to be set according to the minimum mains pressure, thus eliminating annoying fluctuations that can occur in the event of even slight variations in the mains pressure.

MICROMETRIC ADJUSTMENT JOINT

For optimal setting of the manipulator's manoeuvrability.

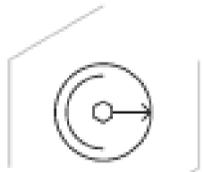

COLUMN

Variable height depending on requirements.

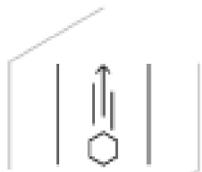

115 KG

**ESTIMATED CAPACITY
AT THE FLANGE**

**3,1 M
RADIUS**

**1,5 M
VERTICAL
STROKE**

OFFSET LOADS

EXECUTIONS:

COLUMN ON SELF-SUPPORTING BASEPLATE

FIXED FLOOR COLUMN

OVERHEAD FIXED

OVERHEAD SLIDING
