

ATIS MIRUS 100

Pneumatic manipulator with rigid articulated arms, the right compromise between capacity and agility. Designed for moving loads that are neither too light nor too heavy, it expresses its potential in adapting to particular working situations. The addition of the specific gripping tool allows the handling of off-centre products in any direction, without constraints.

SAFETY TANK

Certified tank. Allows a number of movements to be performed without mains power supply.

DISC BRAKES

With 6mm thick metal and double brake pads

COMPRESSED AIR CONNECTION

Welded onto the column, with internal passage to the pneumatic control panel.

180 KG
ESTIMATED CAPACITY
AT THE FLANGE
